“YOUR PICTURES MEAN A LOT TO US TOO!”

PHOTO TIPS

L-34

Through quality control and concerned attention to your film we give you the best results we are able. However, you can make your photos even better by remembering:

1. Don't leave your camera and film in the heat. For instance — the glove compartment of your car!
2. Don't leave film in your camera for longer than 2 to 3 months — use shorter rolls if necessary. i.e.: Xmas pictures processed at Easter can be disappointing.
3. Simple instamatic cameras perform best on bright sunny days! Don't shoot on a heavy overcast day unless you insert a used flash cube. This slows the shutter speed and lets in more light.
4. When ordering reprints from negative
 - (a) please do not cut, order by number.
 - (b) if 35mm choose number closest to centre of negative
